

## Global Magnum

### Program Description

Global Magnum is a fully systematic, multi-model trend following program that manages capital across a diversified portfolio of 15 exchange-traded futures markets. Market sectors traded include interest rates, currencies, metals, energies and grains. The program employs nine models which have an intermediate term focus. The use of both trend and counter-trend components in the models lowers the correlation of Global Magnum to other trend following systems. Each model consults a "Fuzzy-Logic Trend Filter" for permission to initiate positions and to take on market risk.

The Barclay CTA Index is a leading industry benchmark of representative performance of commodity trading advisors. There are currently over 500 programs included in the calculation of the Barclay CTA Index. The Index is equally weighted and rebalanced at the beginning of each year. HFRI Indices are designed to capture the breadth of hedge fund industry performance trends across all strategies and regions. All single-manager HFRI Index constituents are included in the HFRI Fund Weighted Composite Index. Neither the Barclay Index nor the HFRI Index is tradeable.
